

WHAT IS A HOME ENERGY RATING?

Energy Ratings indicate the energy efficiency of a new or existing home. Computer software is used to compare a home's energy performance against the best performance possible for that home. Ratings are 1-100 points and 1-5 stars.

<u>Points</u>	<u>Stars</u>	<u>Energy Efficiency</u>
0-39	One	Very Inefficient
40-59	Two	Inefficient
60-79	Three	Average
80-85	Four	Energy Efficient
86-91	Five	Very Efficient
92-100	Five+	Super Efficient

A 5 star rating qualifies a house for the ENERGY STAR designation.

HOW CAN I GET A HOME ENERGY RATING?

The following individuals are qualified to conduct Home Energy Ratings. The listing of a rater does not indicate an endorsement or recommendation by the State of Michigan. The fees charged for ratings will vary.

EASTERN MICHIGAN

Cass River Construction, Caro
Dave Ertman
